

# Comparing the FLAVIA Creation 200™ with the Keurig B200™

## 3 key reasons why the Creation 200™ outperforms the Keurig B200™

### Creation 200™ provides choice

- a wide selection of coffees and teas
- cappuccinos and lattes
- espresso
- hot chocolate

### Creation 200™ is energy-efficient

- average energy cost is \$12.37\*
- uses an estimated 54% less energy annually vs. the Keurig B200™\*
- has an energy-saving mode

### Creation 200™ was built with quality in mind

- tailored brew cycles for coffee/tea, cappuccino, hot chocolate and espresso
- service friendly

Keurig B200™ cannot deliver coffee shop style frothy cappuccino or an espresso style drink, so consumers are limited with the drinks they can have.

Keurig B200™ average annual energy cost is \$27.37\* and does not have an energy-saving mode

Keurig B200™ does not offer tailored brew cycles and is not service friendly
